

USE CASE 1: SCAN & SYNC

Auto File Sync, No Extra Hardware, HIPAA Compliant

Healthcare Org A switched to using EverLeagues to scan, convert, and save paper documents to the cloud.

EverLeagues is HIPAA-compliant and SOC 2 certified, and has both a mobile app and a web app.

Previously, hundreds of nurses from Healthcare Org A took large physical scanners into patients' homes to scan documents. The old scanners were unreliable and a hassle to carry.

Now staff members only need to use the EverLeagues mobile app on their work phones, which they already have with them, to scan documents.

Previously, scans were unstable and may or may not come out as legible.

The EverLeagues scanner tool makes the PDFs come out clean by using edge detection, distortion correction, filters, and more.

Previously, staff had to connect the scanner to their computers to manually transfer the scanned files.

All scanned files are synced real time to the EverLeagues Cloud Files on mobile and web, where staff can download and process them. EverLeagues also set up a custom retention policy for Healthcare Org A - all files are automatically purged after 96 hours. No more worrying about forgotten files!
